

HANDSFREE TELEPHONE

Product Model: JWAT413

Defend Grade: IP54

Communication System: Analogue

Material: Stainless Steel

Color: Stainless Steel (Optional)

Technical Parameters

Voltage	DC5V/1A
Standby Work Current	≤300MA
Frequency Response	250~3000 Hz
Ringer Level	≥85dB(A)
Corrosion Grade	WF2
Ambient Temperature	-20~+60℃
Atmospheric Pressure	80~110KPa
Relative Humidity	≤95%
Lead Hole	1-Ø10
Weight	1.5kg
Installation	Flush mounted

Application

The Hands-free Telephone usually used in elevators, pharmaceutical factories, building intercoms and other environments with special requirements

Features

1. The telephone can form an independent communication system with the program-controlled exchange.
2. Can be directly connected to the telecommunications network.
3. After the call system is formed, each phone is an independent workstation, and the failure of one of the phones does not affect the work of the entire system.
4. After the call system is formed, the product has an automatic gain function, and the size of the voice does not change with the distance or the number of phones.
5. DECG chip, with more outstanding sound, stronger anti-interference ability, digital automatic gain, no howling or intermittent call in the hands-free state..
6. Robust housing, constructed of 304 stainless steel material.
7. stainless steel material is acid and alkali resistant, chemical resistance is strong, and various cleaning agents can be used to clean the surface
8. Hands-free emergency phone.
9. Vandal resistant stainless steel keypad
10. The circuit inside the telephone has strong anti-interference ability, stable and clear voice quality
11. Connection: RJ11 screw terminal pair cable.
12. Self-made telephone spare part available.
13. CE, FCC, RoHS, ISO9001 compliant.

Product Dimensions

Package

Carton size:200*130*65 (mm)

Packaging materials: Pearl cotton, Carton

Net weight: 1.5KG

Gross weight: 1.8KG
